**Graham Robson**

Essential MG documents over 80 years of characterful sports cars whose distinctive family heritage is instantly recognizable behind the Octagon badge. Given that sports cars are as much about style and rakish good looks as performance and sheer fun, the MG has never disappointed its audience.

Author Graham Robson is a lifelong MG enthusiast. Here he presents 36 of the most significant models to map out the MG story.

Each feature car is accompanied by a full history of its design and development together with its competition success and production statistics. A quick reference Milestone feature reviews the car's historical highpoints and a separate chart lists full engineering and performance specifications. Color spreads show the car from different angles and analyze its design features and special details. The book, which is part of a series will become a classic on MGs and an 'Essential' for the bookshelf of every true car enthusiast.
