Super Profile

Lindsay Porter

Would YOU like a superb, high quality, library of motoring and motorcycling books for both pleasure and reference in your own home? Would YOU like to be able to pick and choose titles to suit your own special interests? Would YOU like such books to be available at a very low price? If the answer is 'YES' you need look no further. For the Super Profile series from Foulis is designed to meet YOUR needs. Over the years, and up to the present day, certain car and motorcycle models have appeared which are of great interest to the enthusiast because they have a special "character". The aim of each Super Profile is to take one such model and then to present every facet of its character to the reader by word and picture. A full portrait of the model is built up by describing its history, production changes and specifications. Then there are road tests (usually contemporary), owners' views, details of what to look for when buying, and information on the relevant clubs and specialists. Another feature of every Super Profile is a superb photo gallery of around ninety plates, of which many are in full colour. The gallery serves to illustrate the subject model right the way through its production life and to highlight its special achievements - particularly in motor or motorcycle sport. Individual Super Profiles are not numbered so you can collect as many, or as few, as you wish to create your own library of the world's most fascinating cars and motorcycles.
