# THE WORKS MGs

This is the authoritative story of all the MGs prepared and entered by the MG Car Company and its successors in international competition from the 1920s to the late 1960s. It covers pre-war racing and record-breaking attempts as well as the post-war achievements of the Works cars entered in races and rallies by the BMC Competitions Department. The two authors were personally involved with MGs, Mike Allison as a technical specialist with the company and Peter Browning as the last BMC Competitions Manager. Their own experiences, the recollections of former colleagues and extensive research have been brought together to produce a unique insight into an important and fascinating aspect of British motorsport history.
